UTI CLEANSE

Easy To Use

- Fast Acting
- Increases Liquid Intake
- Lower Price Point
- Manufactured in Canada

The majority (90%) of urinary tract infections are caused by *E. coli* bacteria, which attach themselves to the residues of D-Mannose that are naturally found on the receptors of urinary tract cells. Supplemental d-mannose, provides an alternate binding site for the bacteria, which can then be flushed out. D-Mannose has earned the enviable reputation of being able to provide relief from UTIs with exceptional speed, often in as little as 24-48 hours in many cases.

UTI Cleanse contains 1000mg. of D-mannose per serving which can be used in high doses to treat UTIs caused by *E. coli* without the continued use of antibiotics. It can also be used in lower doses to prevent recurrence.
